3.5mm to 2 RCA Breakout Cables

Kramer's A35M/2RAM and A35F/2RAM series cables are simple adapters which have a stereo 3.5mm connector at one end, and two male RCA connectors at the other. They provide passive conversion between 3.5mm and dual RCA connectors, most often adapting a PC sound card or MP3 player to the audio inputs of a sound system or display device.

FEATURES

- **Quality Construction** - Molded male dual RCAs on one end and molded 3.5mm on the other.
- **High-quality Connectors** - RCA connectors are color coded red, white to match audio connectors on typical equipment.
- **Varied Selection of Lengths** - Available in 3, 6, 10, 12, 15, 25, 35 and 50 foot versions (0.9 to 15.2m).
