

NANUK™

PROFESSIONAL PROTECTIVE CASES

[na•nook]

Inuit for “polar bear”

Inspired by the polar bear, NANUK by Plasticase is mission ready and designed to perform even in the harshest of environments.

NANUK™. The evolution of protection.

For over 20 years Plasticase has been providing carrying and transport solutions to professionals, technicians and sportsmen around the world.

NANUK cases are designed to protect the most sensitive equipment in the harshest environments. Whether battling the scorching heat of the Sahara desert or the bone chilling cold of the arctic, every detail of NANUK has been refined and perfected to offer the utmost in protection and performance. From our high-impact NK-7™ resin to our PowerClaw™ latches, NANUK has been engineered and manufactured to stringent military specifications to surpass the needs of the most demanding users. These virtually indestructible, lightweight, watertight cases offer

the ultimate grade of protection in a variety of sizes, configurations and colors.

Complimented by a large selection of optional accessories and an incredible degree of customizability, NANUK is the best choice to move your equipment in complete security. Whether transporting valuable equipment around the world or simply protecting sensitive tools in the urban jungle, NANUK is up to the challenge.

We stand behind NANUK™ and we guarantee it for life.

Features

NANUK comes loaded with innovative features. Countless hours of research and development went into defining the requirements for NANUK. The result is a line of cases that are equipped to meet today's challenges. Responding to feedback from professionals in various fields, NANUK is the evolution of traditional protective cases.

NANUK has also been designed to adapt as your needs change. Many features that are optional on other cases are standard on NANUK. By integrating attachment features into the case at the design stage, you can easily add a shoulder strap or a panel kit without modifying the case with holes or additional hardware. The attachment features are already there when you need them.

NANUK™ was built with performance and expandability in mind.

The NANUK™ advantage

- 1** Padlockable
- 2** Waterproof
- 3** Impact resistant NK-7 resin
- 4** Soft grip foldable handle
- 5** Powerclaw latching system
- 6** Integrated lid stay
- 7** 100% stainless steel hardware
- 8** Integrated bezel system
- 9** Stackable
- 10** Lifetime guarantee

Waterproof

Water and dirt are the enemies of sensitive equipment. NANUK has been engineered to ensure that your equipment stays dry and functional regardless of the weather conditions.

Waterproof seal

The waterproof seal used in all NANUK cases is custom designed to fit our cases. The hollow core design prevents material deformation or fatigue of the seal to ensure a watertight seal that will last.

Automatic pressure release valve

Changes in altitude and geographic location creates a vacuum which can effectively seal a case shut. NANUK's integrated auto-pressure valve equalizes this atmospheric pressure difference. Using state-of-the-art technology, the micro vent allows air to pass through while preventing water from entering. ▶

Impact Resistant NK-7™ resin

NANUK was designed with one objective in mind: survival. With rounded corners, thick wall construction and oversized details, NANUK is built to absorb the shocks without damaging the case or more importantly your contents.

Based on Plasticase's years of experience in the plastics industry, our new NK-7 resin was developed specifically for the demanding conditions that NANUK will be exposed to. Highly impact resistant, lightweight, and rugged, our NK-7 resin can withstand nature's extremes. ◀

POWERCLAW

LATCHING SYSTEM™

The PowerClaw Latching System (patent pending) used on all NANUK cases is engineered to keep your case closed during the toughest of missions. The PowerClaw clamps the case tightly closed using compressive force while the integrated slide lock prevents the case from opening during transport or when dropped. The super tough nylon construction ensures your precious items remain safely inside the case no matter where the journey takes you. ▶

Soft grip foldable handle

NANUK is tough and durable, but it does have a soft side. The handle structure is molded with our specially formulated high impact NK-7 resin but is over molded with a soft touch rubber for comfort. The soft shock absorbing material reduces fatigue when carrying heavy loads.

The integrated stays keep the handle folded down to avoid damage during transport or shipping. ◀

Accessories

These accessories are available for all case sizes.

TSA padlocks

TSA padlocks offer the security of a padlock but can easily be opened and inspected by airport security and then locked again. A visual indicator lets you know when the case has been opened with a TSA key. ▲

Shoulder strap

Our neoprene shoulder strap incorporates Aircell™ comfort technology to reduce fatigue when transporting your case. The shoulder strap can easily be attached to all NANUK cases without any additional hardware. ▲

Patented Aircell™ technology

Foam liner

Our foam liner is the perfect solution for items that require protection but don't need to be separated or organized. The base is lined with a layer of high density polyethylene foam while the lid of the case features a convoluted foam pad. ▲

Padded dividers

If you require compartmentalized protective organization of your components or equipment, our padded dividers are the right choice. Easily tailored to your needs with repositionable tongue and groove fasteners, our padded dividers are designed to easily organize and protect your equipment. ▲

Cubed foam

Made of high quality polyurethane foam, the multi-layered set of customizable inserts includes a pre-scored removable layer. This layer consists of foam squares that can be removed in various configurations to accommodate the contents of the case. This solution is ideal if you are seeking a quick and easy way to protect and organize your items. ▶

These accessories are available for all case sizes.

Accessories

Waterproof panel kit

A panel kit can easily be added to any of our cases thanks to our integrated bezel system. Included in our waterproof panel kit is a contoured 3/16" thick polycarbonate panel with mounting screws and an adhesive backed die-cut waterproofing gasket. ◀

Custom printing

What better way to make your mark than to have your company's logo or product branding printed in color on our cases? Simply send us your artwork and our experienced graphic designers will work with you to convey your message in the most effective and unique way. ▶

Custom foam

If your application requires a customized solution, specifically adapted to the contents of your case, a custom foam interior is the way to go. Let our experienced team of case interior specialists help you optimize the layout of your components to ensure the utmost protection of your products and equipment. ▼

Custom waterproof panel kit

Not just a case: our case interior specialists can help you incorporate your electronic instruments into NANUK. With our integrated panel kit system you can take full advantage of our OEM housing solution. Simply provide us with your equipment specifications and we will develop an innovative portable unit tailored specifically to your needs. ▲

Color Selector

Whether you need to blend in or stand out, NANUK's seven standard colors give you the choice.

Custom colors are also available with minimum quantities required. Contact us for further details.
